## Drink Tamra Jal To Your Health

Water that has been stored in a copper cup is energized and ionized. In India, they call this transformed healthful water *Tamra jal*.

Copper is an essential micronutrient, essential for the health of all living things. It is an antioxidant that plays an important role in metabolism, largely because it allows enzymes to function properly.

For centuries, yogis have been drinking water stored in copper vessels for its known health benefits: reducing inflammation, improving digestion, and boosting energy.

## Our Mission: Improve Global Access to Clean Drinking Water

As eager as I am to share Ayurvedic health practices that have enriched my life, I am more eager to support safe drinking water initiatives in developing nations. At Vasanti Health we are focused on sustainable solutions to the water crisis taking place around the globe. Our dream is to use a percentage of Tamba Cup™ sales to fund community-led public education, advocacy, and sanitation technologies in India. Please visit our website for more information.

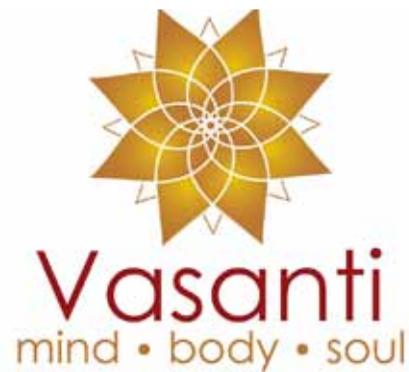

[www.vasantihealth.com](http://www.vasantihealth.com)

## Take Care Of Your Tamba Cup™

I want you to enjoy your copper cup for many years to come, so it is important that you take good care of it.

- Hand wash your cup daily by filling it with warm water and 3-4 tablespoons of lemon juice. Let it stand for about 45 minutes. Then scrub the cup, inside and out, with a nonabrasive cloth and dry it thoroughly. This will prevent dark spots caused by oxidation.
- If dark spots remain, soak the cup for a few hours in a mixture of warm water and lemon juice. Then scrub thoroughly, rinse and dry. However, be assured that this harmless discoloration is only cosmetic and will not diminish the health benefits of your Tamba Cup.™

Never put your Tamba Cup™ in the dishwasher or use detergents to clean it.

# Awaken your water

**Used by Yogis and Gurus for centuries!**  
**Ayurvedic Tamba Cup™**

 The Tamba Cup™ naturally cleanses, ionizes and energizes your drinking water.

Storing water in a copper vessel is one of the most ancient ayurvedic techniques fundamental to many yogic practices. Benefits include: improved digestion, enhanced immunity, and youthfulness.

Photos - Photos of Chees, Hot and variety of Materials.

**A**rlene and Rose Campos probably never imagined that the little grocery store they based their lives on in 1947 would still be here more than 30 years later - successful, growing and continuing the traditions and values on which their future flourished.

Campos's Philly Favorites come straight from their legacy - of quality, family, neighborhood, hard work and devotion, and from the one ingredient crucial to their success and ours: **Personal Service**. It has kept our customers coming back since we, the best generation, took over in 1975.

We grew up in the food and deli business, and we learned that the most important thing we can do is put the customer first. We work hard to give you that extra special attention you deserve. We pay close attention to the details - and the results are exceptional.

When Mike says, "That's not just a sandwich, that's someone's meal! Make it great!" - it comes from his heart. Our business is more than just hoagies, steaks and sandwiches, it's personal - and it shows.

So when you order any of the extra special foods we make here in our Philadelphia kitchen, you'll discover that, just like Arlene and Rose, we don't let anything leave without a little love in it.

CONSTRUCTION TECHNOLOGY CONFERENCE

# Theometrics

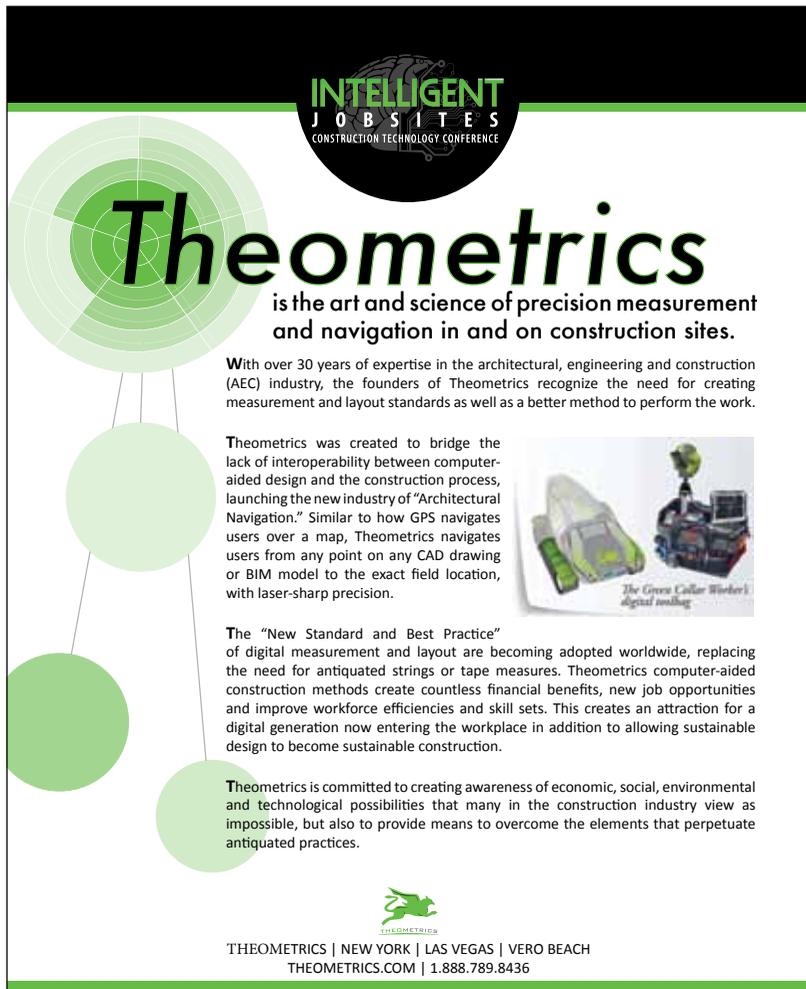

is the art and science of precision measurement and navigation in and on construction sites.

With over 30 years of expertise in the architectural, engineering and construction (AEC) industry, the founders of Theometrics recognize the need for creating measurement and layout standards as well as a better method to perform the work.

Theometrics was created to bridge the lack of interoperability between computer-aided design and the construction process, launching the new industry of "Architectural Navigation." Similar to how GPS navigates users over a map, Theometrics navigates users from any point on any CAD drawing or BIM model to the exact field location, with laser-sharp precision.

The "New Standard and Best Practice" of digital measurement and layout are becoming adopted worldwide, replacing the need for antiquated strings or tape measures. Theometrics computer-aided construction methods create countless financial benefits, new job opportunities and improve workforce efficiencies and skill sets. This creates an attraction for a digital generation now entering the workplace in addition to allowing sustainable design to become sustainable construction.

Theometrics is committed to creating awareness of economic, social, environmental and technological possibilities that many in the construction industry view as impossible, but also to provide means to overcome the elements that perpetuate antiquated practices.

THEOMETRICS | NEW YORK | LAS VEGAS | VERO BEACH  
THEOMETRICS.COM | 1.888.789.8436

## WHY THEOMETRICS

There is a digital divide in the construction industry and its new Theometrics Command Center innovative strategies for bridging the gap between CAD, BIM and construction.

Building Information Modeling (BIM) is today's revolutionary construction tool. Theometrics Command Center is the only software that allows you to order for BIM site measurements directly from your existing construction software.

Charles Thornton, Director of Business Development, says: "Theometrics offers technological innovations in design, construction management services and printing. Theometrics services within its Command Center include: Design Team, Architects, Engineers, Consultants; Owners Representatives, Construction Managers; Theometrics Digital Measurement and Layout Services Green Callor Jobs for the Next Generation; General Contractors; Subcontractors.

THEOMETRICS | NEW YORK | LAS VEGAS | VERO BEACH  
THEOMETRICS.COM | 1.888.789.8436

## THEOMETRICS UNIVERSITY

Let None Ignorant to Technology Enter Here

Theometrics University (Theo U) was created to raise awareness, educate and train entrepreneurs, professionals, consultants and contractors about the key issues that plague the construction industry. Additionally, the programs provide various solutions and opportunities in advanced technologies available to aid the sustainable construction process and to compete in a global economy. Theo University is an AIA continuing education approved credit provider. Theo University is dedicated to advancing the future of sustainable construction.

Visit [www.theometrics.com/theouniversity](http://www.theometrics.com/theouniversity) or call 1.888.789.8436 for more information.

### Theometrics Solutions

Access the Untapped Gold Mine

There are countless articles, books, associations and universities raising awareness or teaching the Green Movement, BIM and the need for IPD. Most all focus on design and coordination and neglect the construction process, where up to 80% or more of a construction budget is expended.

Similarly USGBC and others that have done a great job creating a point system, LEED Points and LEED Certification, to create a measure for reducing the carbon footprint. However, they neglect accounting for the construction phase which is 80% of a project's budget. Theometrics has created opportunities in Architectural Navigation, manufacturing, assembly and programming of Theometrics hardware and software, consulting, forensics, expert witness testimony, specialized legal and accounting services, pre-construction coordination services, extending BIM to the field, dimensional quality control, risk mitigation, sustainable construction as well as digital measurement and layout.
